**CHAPTER
ONE**

INTRODUCTION

ch3a is a simulation tool to evaluate tax implications of investments in the Swiss third pillar (3. Säule). By comparing investments into the government supported pillar 3a to free investments, it helps you to decide which way of investing is more tax beneficial.

It is provided as a python package.

1.1 Motivation

1.2 Limitations

**CHAPTER
TWO**

INSTALLATION

CHAPTER
THREE

CONTRIBUTING

3.1 Code

3.2 Documentation

3.3 Bug reports

**CHAPTER
FOUR**
